Cisco Router Troubleshooting Guide

Determine which name server you are using; this can be found in different places on each operating system, so if you are unsure of how to find it, consult the device's manual. For examples: - On a Cisco router, type show run and look for the name-server. - On Windows 95 or 98, use winipcfg.exe. - On Windows 2000 or NT, use ipconfig.exe.
