In *Consciousness and the Social Brain*, Princeton neuroscientist Michael Graziano lays out an audacious new theory to account for the deepest mystery of them all. The human brain has evolved a complex circuitry that allows it to be socially intelligent. This social machinery has only just begun to be studied in detail.

Consciousness and the Social Brain by Michael S.A.

Graziano

'In this theory, the brain is an information-processing device. It doesn't produce non-physical essences -- it computes information,' Graziano said. Graziano has given consciousness a more solid footing in the real, tangible world even if it remains a creation of the brain, Schurger said.

Consciousness and the Social Brain - Kindle edition by ...

Consciousness simply arises in some mysterious fashion. The second flaw is that the theories usually focus on how the brain produces consciousness, but ignore how consciousness produces behavior. This ignores the only objective thing about consciousness, which is that we can state that we have it.

The human brain has evolved a complex circuitry that allows it to be socially intelligent. This social machinery has only just begun to be studied in detail.

Consciousness and the Social Brain - Michael S. A ...

The Brain Basis of Consciousness The Graziano lab focuses on a mechanistic theory of consciousness, the Attention Schema Theory (AST). The theory seeks to explain how an information-processing machine such as the brain can insist it has consciousness, describe consciousness in the magicalist ways that people often do, assign a high degree of confidence to those assertions, and attribute a ...

Graziano Lab: CONSCIOUSNESS AND THE SOCIAL BRAIN

Social institutions are those which produce collective consciousness, for example, the church fosters religiosity among groups of people affiliated with different religions, the state and politics ...

(PDF) Collective Consciousness and the Social Brain

The attention schema theory of consciousness describes how an information-processing machine can make the claim that it has a

consciousness of something. In the theory, the brain is an information processor that is captive to the information constructed within it. The challenge of explaining consciousness is not,...

Consciousness and the Social Brain - eBooks.com

Since 2010 Graziano's lab has studied the brain basis of consciousness. Graziano proposed that specialized machinery in the brain computes the feature of awareness and attributes it to other people in a social context. The same machinery, in that hypothesis, also attributes the feature of awareness to oneself.
