DIN 40050-9 - Techstreet

DIN 40050, Part 9 - A standard that describes a test for protection against foreign objects, water and access, generally associated with road vehicles but is used in this standard to define an additional protection level. EN - European Standard (EUROPÄISCHE NORM)

Scale Manufacturers Association (SMA) STANDARD

The standard DIN 40050-9 supplements IEC 60529 with added IP degree of protection for high-pres-sure (80-100 bar) and high temperature (80 °C) in cleaning applications. Devices for these require-ments not only have to be dust-proof, but also be able to withstand the stresses during highpressu-re cleaning and the use of steam jets.

DIN Standards are the results of work at national, European and/or international level. Anyone can submit a proposal for a new standard. Once accepted, the standards project is carried out according to set rules of procedure by the relevant DIN Standards Committee, the relevant Technical Committee of the European standards organization CEN (CENELEC for electrotechnical standards) or the ...

DIN Standards

DIN 40050-9 extended the newer IEC 60529 rating system with

an IP69K rating for high-pressure, high-temperature wash-down applications. Enclosures conforming with ISO 20653:2013 must not only be dust-tight (IP6X), but also able to withstand high-pressure and steam cleaning.
