B2799 TOYOTA Engine Immobilizer Malfunction

Hi there! I imported a 2005 Toyota Rav4 from Japan, and once it arrived I wasn't able to start it. The DTC brought up code B2799 wich is related to engine immobilizer although the auto electricians I've contacted so far said that model does not have an immobilizer system and somehow I endorse their stance because its keys are one without chip.

Code B2799: Engine immobilizer system malfunction

B2799 Engine Code Meaning - B2799 Engine Trouble Code ...

The B2799 code means that the immobilizer system did not recognize the ignition key at some point when it was inserted into the ignition cylinder. If the engine is starting up and running fine at this time that means that the immobilizer system is functioning properly at this time. The code could have been set from someone sticking the wrong key in the vehicle because it will stay in the history of the immobilizer system.
