### Honda Civic losing coolant no visible leak

A Honda Civic's cooling system is a sealed system, meaning that it uses pressure to raise the boiling point of the fluid within the radiator. As the engine operates, the fluid within the radiator circulates throughout the engine. Most overheating problems with these vehicles can be traced to gasket failure, leaks or to worn components.

### How to Troubleshoot a Honda Civic Overheating | It Still Runs

But your Honda cooling system does more than just remove heat. It also keeps the engine at a warm enough temperature for proper emissions control, as well as to generate heat inside your car on cold days. Essentially, the cooling system maintains a safe operating temperature - not too hot and not too cold.
