Economics 139D/239D: Introductory Econometrics December 1, 2008 ... Goldberger, "Introductory Econometrics ... exercises (no more than two) from each problem set, which will then be carefully graded (again, without recording the grade) and returned to you. This is a way for you to test your understanding of the material on problems that

Duke University - Department of Economics - Fall 2008 ...

To help students master the tools of econometrics, Goldberger provides many theoretical and empirical exercises and, on an accompanying diskette, real micro- and macroeconomic data sets. The data sets deals with earnings and education, money demand, firm investment, stock prices, compensation and productivity, and the Phillips curve.

Introductory Econometrics (□□)

iii) The intercept implies that, even if $mrate = 0$, the predicted participation rate is 83.05%. The coefficient on $mrate$ implies that a one-dollar increase in the match rate - a fairly large increase - is estimated to increase $prate$ by 5.86 percentage points. This assumes, of course, that this change $prate$ is possible (if, say, $prate$ is already at 98, this interpretation makes no sense).
