The majority of robots working today aren't the walking, talking robots you see in science fiction movies. Instead, they're just machines that perform tasks without human help. Usually they are controlled by a computer and are used to efficiently carry out simple jobs.

### Rise of the Robots - Scholastic

Rise of the Robots provides a compelling case that they are real."—Wall Street Journal "Surveying all the fields now being affected by automation, Ford makes a compelling case that this is an historic disruption--a fundamental shift from most tasks being performed by humans to one where most tasks are done by machines."—Fast Company

### Rise of the Robots: Technology and the Threat of a Jobless ...

I read the Rise of the Robots (2014) and The Second Machine Age (2011) back to back. Both books cover similar topics, such as Winner Take All, the Long Tail, the jobless future and some education considerations to improve employability in such an economy. However, I enjoyed Rise of the Robots more.

Many have linked technological development with pessimistic views, be they the Luddites, 19 th century textile workers who rebelled against the machines taking away their jobs, or Martin Ford, who, in his book Rise of the Robots warned of a jobless future due to automation. Such pessimistic views have long led to ideas of the formation of a new social class.

## **HD [Documentary] Rise of the Robots**

Rise of the Robots is a brisk, accessible overview of current thinking about the possibilities of automation. Martin Ford takes us through the major issues, technologies, and problems. He begins with several chapters exploring what we mean by automation (robotics plus good software), the importance of developments over the past decade, and the macroeconomic context.

## **Rise of the Robots: Technology and the Threat of a Jobless ...**

Rise of the Robots: Technology and the Threat of a Jobless Future is a 2015 book by American futurist Martin Ford. Rise discusses the impact accelerating change and artificial intelligence will have on the labor market. His thesis is that there will be great social and economic disruption, as educated workers will no longer be able to find employment; unlike in previous technological revolutions, very few new jobs will be created in the course of the ongoing disruption.
